Experience

interService ISP - Nadym, Russia

Sep 2008 - Present

www.home-nadym.ru

CTO / Linux Administrator

Internet Service Provider with more than 15000 customers. My core responsibilities are:

- Billing (proprietary software with a lot of 3rd-party external components, mostly php, perl and python based)
- CRM development (management, architecture)
- Monitoring (M/Monit, Zabbix, netdata)
- Virtualization (Proxmox, KVM, LXC, OpenVZ)
- Databases (mostly MySQL and PostgreSQL, MongoDB and SQLite on rare occasions)
- 3rd line of support, real problems solving
- Secondary systems (DNS, DHCP, DPI, Mail server, various Atlassian products, Slack/Mattermost and many, many more)

interService Software - Austin, USA

Mar 2015 - Jun 2019

www.interservice.us

Technical Consultant / DevOps / Management

An attempt to move away from ISP which I was a part of. A couple of (not very successful) projects worth mentioning:

- myplan.travel
- engym.com

Some new skills related to web and mobile development, CI and git were acquired.

Skills

- Linux (any distro, most familiar with RHEL/Centos and Debian)
- sh/bash, python, php, lua, tcl & more for daily admin tasks
- Database management (MySQL, PostgreSQL, MongoDB)
- Web Servers (nginx, lighttpd and all related stuff)
- DNS stuff (nsd, unbound, zone editing)
- Firewalls (iptables/firewalld)
- Virtualization (KVM, LXC, OpenVZ)
- Mail (postfix, dovecot, amavisd & friends, Axigen)
- Git (along with Github, Gitlab and BitBucket)
- Ansible (where it's really needed)
- Various web development tools (node, ts-node, npm, pm2)
- Google-fu™

Personal info & Activities

I'm 31, divorced, and spent most of my life in Siberia before coming to Serbia. My English is good, I guess, since it's heavily related to my work. I'm currently learning Serbian, but pretty much stuck somewhere near Beginner level.

I prefer to work remotely and without any fixed work hours. I know my job well and I'm available 24/7, ready to solve an important problem ASAP.

Being a workaholic, it's hard to find free time, but when I have it I like to travel while listening to some music. Cycling is also one of my newly acquired passions. I love to participate in some open-source projects. Besides, I myself have many small and useful (or not so useful) projects on github:
