Experience

BeeJee - Kyiv, Ukraine

Jan 2021 - Present

beejee.org

Project Manager

Over the course of two years, I managed more than 25 different projects, all with different levels of complexity, different sets of requirements, and different sets of features. Some notable examples:

- mvisystems.com (building access control system)
- gondola.travel (tour operator platform)
- pencilquasar.com (roadmapping tool)
- virtualpsychology.com (diagnostic tools for mental health professionals)
- scopesports.io (NFT trading platform with exclusive community-focused features)

interService ISP - Nadym, Russia

Sep 2008 - Aug 2020

home-nadym.ru

CTO

Internet Service Provider with more than 15000 customers. My main responsibilities were:

- Billing (proprietary software with many third-party components, mostly based on PHP, Perl and Python)
- Monitoring (M/Monit, Zabbix, netdata)
- Virtualization (Proxmox, KVM, LXC, OpenVZ)
- Databases (mostly MySQL and PostgreSQL, MongoDB and SQLite on rare occasions)
- Secondary systems (DNS, DHCP, DPI, Mail server, various Atlassian products, Slack/Mattermost and many, many more)

We also had a software development department where I managed the development of two separate projects:

- myplan.travel (itinerary planner)
- engym.com (language learning platform)

Skills

- Agile/SCRUM, Kanban boards and various project management tools
- Staff management, conflict resolution
- Task decomposition, requirement gathering, systems analysis
- Critical thinking, problem-solving, resourcefulness
- Linux (any distro, most familiar with RHEL/Centos and Debian)
- Python, PHP, LUA, TCL, sh/bash/zsh, Ansible & more for daily admin tasks
- Database management (MySQL, PostgreSQL, MongoDB)
- Web Servers (nginx, lighttpd and all related stuff)
- DNS stuff (nsd, unbound, zone editing)
- Virtualization (KVM, LXC, OpenVZ, docker)
- Mail (postfix, dovecot, amavisd & friends, Axigen)
- Git (along with Github, Gitlab and BitBucket)
- Job interviews, candidate evaluation
- Google-fu™
- LLM prompting

Personal info & Activities

I'm 35 years old and I spent most of my life in Siberia before I decided to move to Serbia. My English is fluent because it's very much related to my work. I'm also learning Serbian.

I prefer to work remotely and have a flexible work schedule. I'm good at my job and I'm available 24/7, ready to solve an important problem as soon as possible.

Being a workaholic, it's hard to find free time, but when I do, I like to travel while listening to some music. Cycling is also one of my newfound passions. I also like to participate in some open source projects and I have many small and useful (or not so useful) projects on github myself, such as a flat file CMS engine and a shortcut manager for MacOS with ~1200 active users:
